Title	: **CRM: Customer Relationship Management.**
Client	: Own product
Role	: Test Engineer
Testing Tool	: Manual Testing
Duration	: Aug' 2018 to Nov 2018.
Team Size	: 3

Description

      Customer relationship management (**CRM**) is an approach to manage a company's interaction with current and potential customers. It uses data analysis about customers' history with a company to improve business relationships with customers, specifically focusing on customer retention and ultimately driving sales growth. Contact center CRM providers are popular for small and mid-market businesses. These systems codify the interactions between company and customers by using analytics and key performance indicators to give the users information on where to focus their marketing and customer service. This allows agents to have access to a caller's history to provide personalized customer communication. The intention is to maximize average revenue per user, decrease churn rate and decrease idle and unproductive contact with the customers.

Responsibilities

- Designing and Developing Effective Test Cases.
- Reviewing of Test Cases.
- Test Data Preparation and Reviewing.
- Execution of Test Cases.
- Defect Tracking and Reporting.
- Functionality Testing.
- Integration Testing.
- System Testing.
